

Education Storage

With over 40 years experience in the design, manufacture and install of a huge range of storage solutions for Education, Rackline are the perfect partner to maximise your space.

RACKLINE

Rackline's manufacturing facility operates from our main factory site in Staffordshire. The skilled teams boast hundreds of years of manufacturing skills between them, allowing for high volume production and highly flexible, high quality bespoke output.

The entire Rackline business adheres to both ISO9001 and ISO14001 standards, and has a focus on reducing its environmental impact. As a responsible manufacturer we take as many steps as possible to ensure that our manufacturing equipment and practices are as environmentally focused as possible.

EDUCATION STORAGE SOLUTIONS

Rackline are the experts in the development of storage for educational institutions, having created solutions for Universities, Schools, Colleges and more, since 1984. Together with a range of standard storage products, Rackline's teams can also support you with the development of truly bespoke, tailored solutions to meet the individual needs of your organisation and its departments.

Static Shelving:

Rackline provides a cross section of static shelving solutions that are perfect for any education setting. We can provide smaller units for classrooms, units for storage areas, and even full archives or libraries. Our systems are tailored meet your needs and the items you want to store.

Mobile Storage Solutions:

Rackline's mobile systems are designed to maximise storage space without compromising on efficiency. These systems provide up to 70% more storage capacity compared to regular shelving, and can be adapted to hold any items you require.

Industrial Shelving:

Perfect for classroom store cupboards, gym storage or garage areas, our industrial solutions are designed to supporting the storage of even the largest of items. Talk to us about our Speedrax storage shelving, cantilever racking or long span options.

Office Solutions:

Rackline office storage options are equally at home within office areas, teaching spaces or libraries. Our lockers, cupboards and shelving ensure an orderly, accessible space, while innovative mobile and rotary units provide more storage than traditional filing solutions in the same footprint.

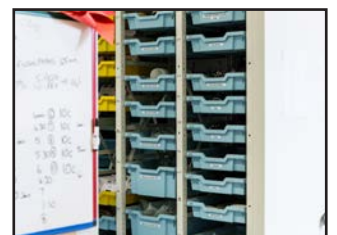

Secure Cabinets

Rackline's secure cabinets and other solutions are designed to securely store high-value, rare, or confidential materials. Manufactured from Steel with sturdy locks and hinges, they provide protection for your restricted items while allowing quick access to authorised team members.

Drawer and Trays

Rackline offers more than just shelving – our teams are experienced in the provision of accessories to fit your needs. Talk to us about the addition of drawers, trays, dividers or adaptations to fit your standard drawers, boxes or file sizes.

STATIC SHELVING

The Rackline teams manufacture a range of static shelving solutions. These are designed to be fitted in a set position and secured in place to provide permanence, structure and stability.

Our static solutions are often chosen to create efficient high-density storage environments within store rooms, libraries or archive areas.

Rackline static systems and options can be manufactured to meet your individual requirements, and even combined with our mobile bases to maximise your storage areas.

DOUBLE SKIN

Rackline's Proform and ProLibero shelving solutions are designed with optimal protection in mind, making them perfect for securely storing valuable educational materials. Built with a strong 'box' section upright and durable double-skin panels, these systems provide long-lasting stability.

Proform provides easy access while ensuring protection, with no protruding edges or seams. This makes this system perfect for any environment.

This double-skinned shelving can be configured as static shelving, or combined with our mobile bases, offering flexible solutions for your storage needs.

SINGLE SKIN

Rackline's Profile single-skin shelving is designed for efficient and secure storage in educational environments. Featuring a panel with a double-form rear section, this closed-wall steel system includes intermediate uprights to support shelves across adjoining bays.

Profile is perfect for organising archive boxes, files, and other materials. Shelves are designed without sharp edges on the uprights, reducing the risk to stored items.

Profile shelves are interchangeable with clips, and a wide range of accessories are available for added customisation.

Like Rackline's other shelving solutions, Profile can be powder-coated in your choice of colour, offering a durable, UV-resistant finish that ensures long-lasting use in educational spaces.

Profile is tested to BS EN 14073-2:2004 standards and delivers reliable and practical storage.

OPEN POST

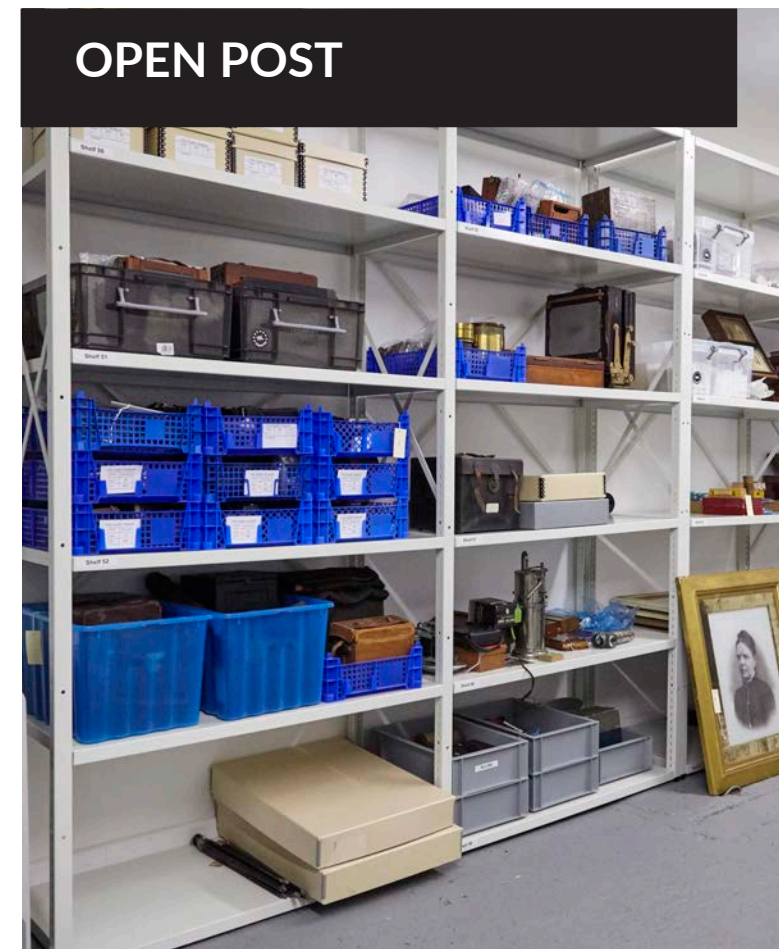

Rackline's Prospan shelving is designed as a more robust solution. This system bridges the gap between our Profile, Proform, and industrial systems.

This system is ideal for large archives or spaces requiring high-density storage.

Prospan maximises the vertical space within your storage areas and provides adjustable heights up to 4500mm.

Unlike traditional longspan shelving systems, Prospan maintains a sleek, modern design that suits any environment while providing the strength needed for heavy-duty storage.

Available in widths from 1200mm to 1600mm, each shelf can support up to 125kg, making it perfect for storing large books, educational materials, and equipment.

MOBILE SHELVING

Rackline's mobile storage systems are the perfect solution for maximising storage capacity within educational settings. Whether you refer to it as mobile shelving, mobile aisle shelving, compactus, roller racking, or rolling stack, we offer a variety of mobile storage options tailored to the needs of schools, universities, and libraries.

These systems help optimise space, providing efficient and organised storage, that retains easy access and flexibility.

INCREASE YOUR SPACE BY 70%

POWERTRAK

Powertrak electronic mobile shelving takes the effort out of organising and retrieving archived materials in educational environments.

Building on Rackline's reliable Monotrak and Multitrak systems, Powertrak features motorised modules that eliminate the need for manual winding or handles. Despite its advanced programmable logic controls, the system is designed with simplicity in mind, offering easy-to-use operator controls.

In everyday use, users simply press 'Green for Go,' and the system automatically manages all functions, making it the perfect solution for schools, universities, and libraries that require an efficient, high-tech storage system.

MONOTRAK

Monotrak is a high-density mobile shelving system designed to maximise storage space.

It operates on a single surface-mounted guide track that is non-trip, eliminating the need for the infill floors and access ramps commonly required by other systems.

The guide rails cause minimal disruption to the floor and allow for quick installation and easy relocation if needed. With slim carriage profiles and a robust design, Monotrak supports load capacities of up to 3000kg across spans of up to 5 meters. This system can also be integrated with any of our static shelving models, providing flexible, efficient storage.

MULTITRAK

Multitrak mobile racking operates on the same principle as our Monotrak solution. However Multitrak builds on it with the inclusion of multiple torque tubes and wheels. This allows for both longer bases and much higher load capacity.

Multitrak carriages can be up to 12 metres long and can accommodate load capacities up to 15 tonnes per carriage.

Even with high weight-loads the clever design of Multitrak ensures that carriages can be moved with ease.

Multitrak is perfect for archive applications, no matter the size. The units are also ideal for buildings with uneven floors, ensuring smooth and efficient operation in any archive setting.

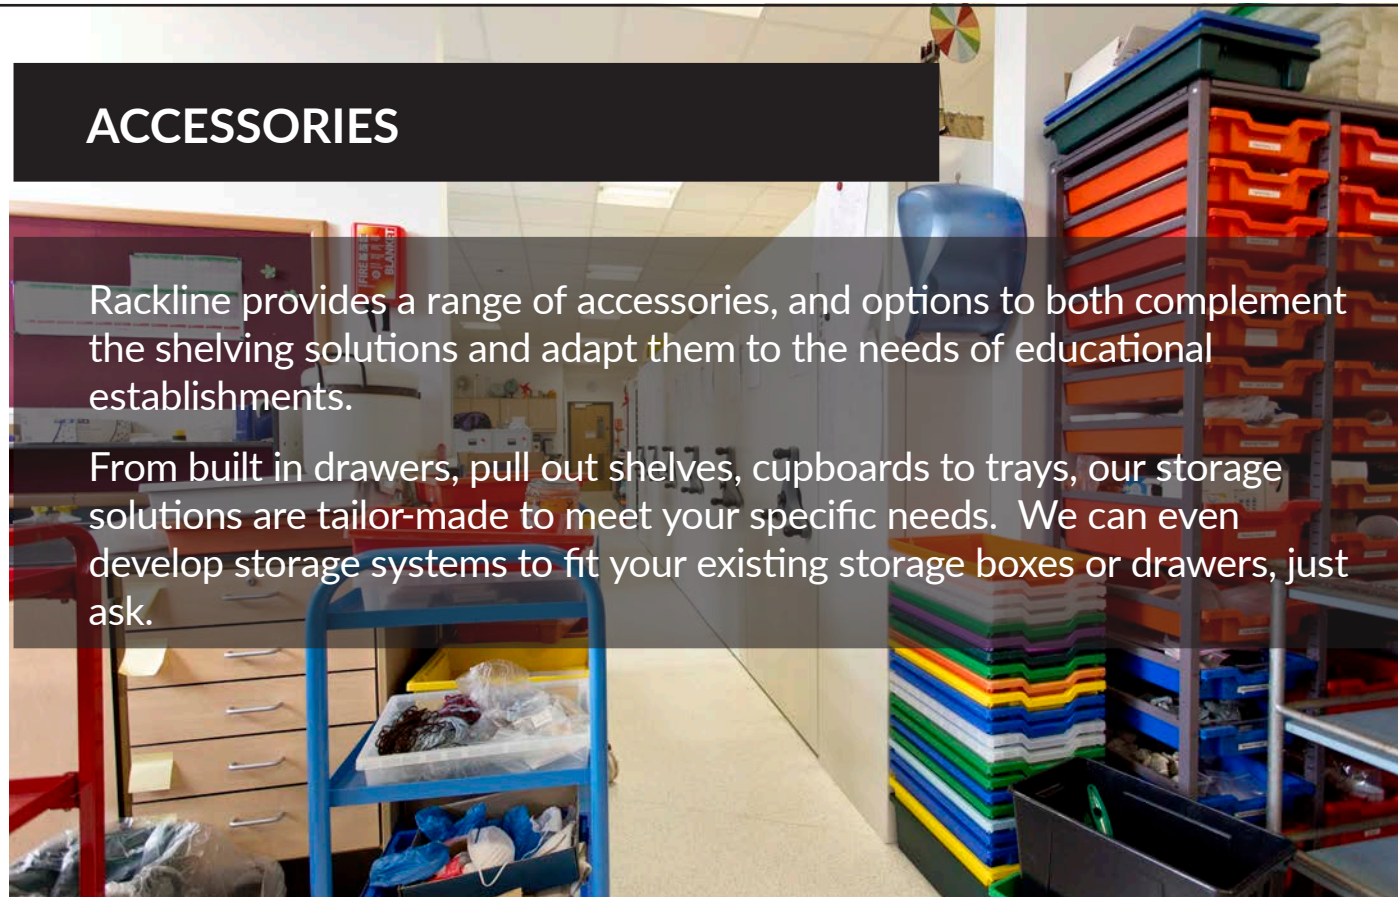

Multitrak tracks can be installed within 'new build' floor screeds, allowing for a flush, non-trip finish.

Simply combine Multitrak with a selection of Rackline's static shelving, drawers or any other solution you require.

ACCESSORIES

Rackline provides a range of accessories, and options to both complement the shelving solutions and adapt them to the needs of educational establishments.

From built in drawers, pull out shelves, cupboards to trays, our storage solutions are tailor-made to meet your specific needs. We can even develop storage systems to fit your existing storage boxes or drawers, just ask.

DRAWERS

At Rackline we supply drawers as both stand alone units (such as our plan chests) and also as part of a shelving install.

Drawers can be added to our shelving systems, adapting them to provide safe, organised storage for valuable educational materials.

Constructed from robust steel, our drawers offer reliable protection for documents, files, and sensitive resources within schools, universities, and libraries.

With a virtually infinite number of sizes and configurations available, our drawers can be customised to meet your individual requirements.

LOCKERS

Rackline's range of secure lockers are designed to meet the storage needs of schools, universities, and educational institutions.

Our lockers are built in durable steel and come with lockable doors to ensure the safety of personal belongings, documents, and valuable educational materials.

Whether for staff, students, or archives, our lockers provide flexible storage in a variety of sizes and configurations.

If you have a particular requirement, then talk to us, as we can manufacture units with the features that meet your individual needs.

ACCESSORIES GALLERY

INDUSTRIAL SHELVING

Rackline also offers a range of heavy-duty steel shelving systems. These are designed for store rooms and classrooms where greater weight-bearing capacity is required.

These industrial-style solutions are perfect for school archives, libraries, or classrooms needing reliable storage for bulky materials and equipment.

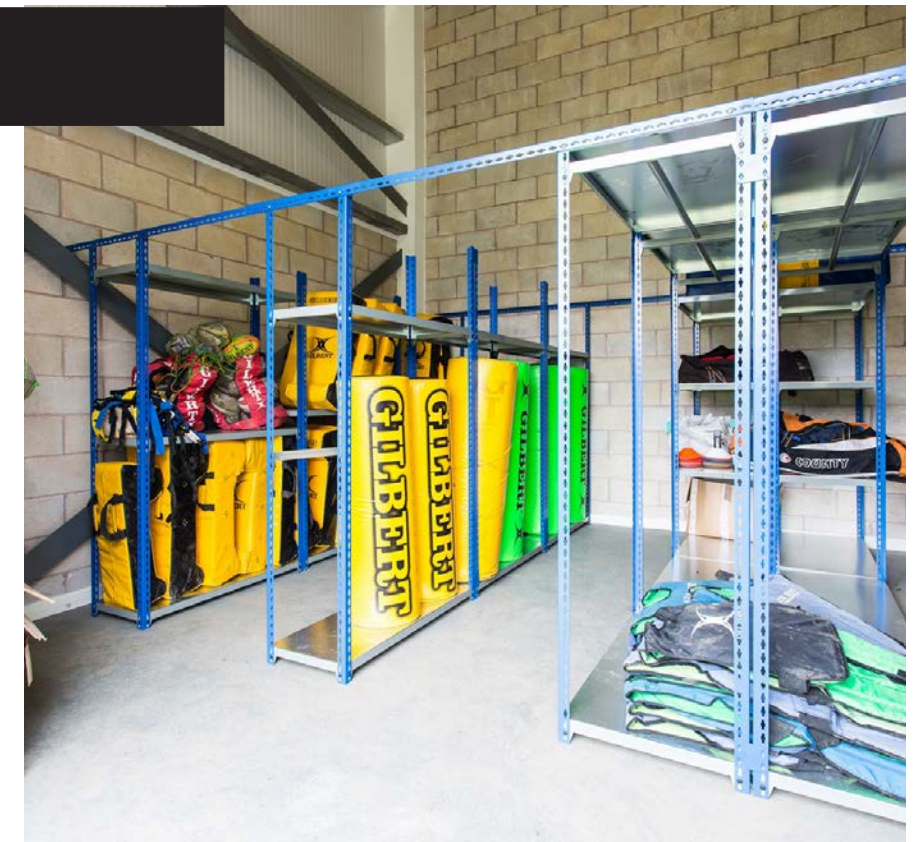

Our robust shelving and racking systems are built to handle demanding environments, providing efficient, long-lasting storage for a variety of items.

SPEEDRAX

Rackline's Speedrax storage shelving provides a flexible and affordable solution for educational storage.

With a variety of size options, Speedrax shelves are easily adjustable to meet your changing inventory needs. The system has a weight capacity of up to 700KG per Shelf.

Constructed with steel posts and beams supporting either chipboard or steel decks, Speedrax is perfect for storing bulky textbooks, teaching materials, and other educational resources. Further, as it is open on all sides it provides easy access to the shelf contents.

WIDESPAN

Widespan is Rackline's adaptable longspan shelving system, perfect for educational storage needs.

Widespan features steel or chipboard shelves with spans of up to 2.7 meters. It is supported by either open or closed-end frames, making it ideal for libraries, schools, and universities.

The system can easily be configured for two-tier or high-bay installations and offers a range of beam profiles to suit various spaces.

Without back braces, Widespan provides access from both sides of a single-entry bay, which reduces the need for double-entry layouts and lowers initial costs. With adjustable shelf levels and a sleek, smooth front face, Widespan offers both style and functionality.

TAILORED SOLUTIONS

One of the biggest advantages of partnering with Rackline is our ability to create tailored storage solutions that meet the unique needs of educational environments. Whether you're looking to maximise space in classrooms, libraries, or archives, our team works with you to design and implement customised solutions that fit your resources perfectly.

From initial space planning and design, to manufacturing and installation, our dedicated team supports you throughout the entire process.

SPECIALIST STORAGE AND DISPLAYS

Rackline is not simply a reseller, our team specialises in bespoke design and manufacture. With experience reaching back to 1984, we are experts in the development of tailored storage solutions for educational organisations. Whatever your needs, we can design, and create custom solutions that fit your space and materials perfectly.

Our expert design team excels at transforming unused spaces into efficient storage areas within schools, universities, libraries, and archives. Whether you require a single secure cabinet for important documents, a dedicated area for a specific subject, or a comprehensive archive setup, we can help you to optimise your space and keep your resources safe and organised.

Rackline are the experts in the manufacture of specialised storage systems, supporting organisations worldwide in the safe storage and protection of their valuable items.
