

Industrial Storage

With over 40 years experience in the design, manufacture and install of a huge range of storage solutions for a diverse audience, Rackline are the perfect partner to maximise your space.

RACKLINE

Our manufacturing facility operates from our main factory site in Staffordshire. The skilled teams boast hundreds of years of manufacturing skills between them, allowing for high volume production and highly flexible, high quality bespoke output.

The entire Rackline business adheres to both ISO9001 and ISO14001 standards, and has a focus on reducing its environmental impact. As a responsible manufacturer we take as many steps as possible to ensure that our manufacturing equipment and practices are as environmentally focused as possible.

INDUSTRIAL STORAGE SOLUTIONS

Rackline's teams are the experts in the creation of industrial storage areas, having implemented solutions for a huge cross section of sectors since 1984. Together with a range of standard storage products, Rackline's teams can also support you with the development of truly bespoke, tailored solutions to meet our individual requirements.

Speedrax:

Speedrax is Rackline's tough utilitarian shelving solution. The system combines strong steel uprights and beams with timber or metal decks. Speedrax is modular and boltless, simple and quick to assemble and perfect for more industrial uses.

Widespan:

Widespan is Rackline's longspan shelving system which features either Steel or Chipboard Shelves on spans up to 2.7 metres. Supported by either open or closed end frames, Widespan can be easily adapted to two-tier or high bay installations. With no back braces, access is possible from both faces of the bay.

Pallet Racking:

Rackline's pallet racking solutions provide safe storage for your inventory. Our dedicated teams are experts in the creation of safe, efficient warehouse spaces, and can help you in the development of new storage areas, logistics hubs, or with the renovation and improvement of existing ones.

Complete, Bespoke Solutions:

The products listed within this catalogue are just some of our offerings, those that are immediately suited to industrial environments. For a complete solution we can combine a cross section of our products, together with storage items that are designed and manufactured to your specific storage space and inventory.

To gauge your needs our consultants visit your site, examine your space and items, then provide you with design ideas, and solutions to fit your individual needs. Talk to us for more details.

INDUSTRIAL STORAGE

Rackline manufactures and installs a range of industrial shelving systems suitable for back of house storage areas, warehouses and spaces that require a more ‘industrial’ look and feel.

These industrial offerings consist of racking and storage products designed for use across more demanding business environments. Our industrial shelves provide practical storage space for a vast range of items, and are perfect for larger, heavier items.

SPEEDRAX

With a wide range of size configurations, Rackline’s Speedrax shelving is a cost effective option for all your storage needs.

The shelving system is strong, yet in its basic form, boltless and simple to assemble.

Speedrax shelving is adjustable and adaptable to your changing inventory requirements, and offers unrestricted access from all sides.

Depending upon your requirement, Speedrax combines strong steel posts and beams that support chipboard or steel decks.

These shelves are ideal for bulky items and rated to carry up to 700kg per shelf.*

*Uniformly distributed load for a 1500mm wide shelf.

WIDESPAN

Widespan is Rackline’s name for its longspan shelving system.

Widespan features either Steel or Chipboard Shelves on spans up to 2.7 metres, supported by either open or closed end frames.

Rackline’s Widespan can be easily adapted to either two-tier or high bay installations with a wide range of beam profiles.

As Widespan has no back braces, access is possible from both faces of a single entry bay, this eliminates the need for a double entry configuration, and reduces the initial cost.

Widespan is both attractive and versatile with easily adjustable shelf levels and a smooth front face.

Examples of suitable environments for Widespan installations include: industrial settings, archives, museums, healthcare organisations and back of house retail.

Widespan can also be combined with our mobile bases to maximise space.

PALLET RACKING

Rackline’s Warehouse Pallet Racking solutions help you and your business to improve efficiency and store more within your warehouse or back of house areas.

Our installation service and robust racking solutions are proven in warehouses across the UK.

Designed to be loaded by forklift trucks, our warehouse pallet racking systems are adjustable to fit your needs.

Our racking consists of robust uprights equipped with horizontal load beams that support your pallets. Beams can be fitted and adjusted within the frames to pitch heights that suit your individual pallet heights.

Together with racking, we can also supply a range of decking options to suit your needs. These support the storage of poor quality pallets, transit pallets, or unusual items.

Talk to us to explore your options.

Rackline are the experts in the manufacture of specialised storage systems, supporting organisations worldwide in the safe storage and protection of their valuable items.
