

# Proflex Cabinets and Lockers

Proflex is Rackline's brand new range of high quality lockers for the office environment.

Until now, the only options in the market for office lockers were expensive high quality lockers or poor quality leisure centre style lockers.

Spotting a gap in the market for high quality, reasonably priced locker systems for the office, Rackline's technical team developed Proflex.

Proflex Cabinets and Lockers are designed to suite in with high quality office furniture and modern storage such as our very own Low Level range – Filestation, Low Trak and The Spin – and are available at cost effective prices.

Proflex Cabinets and Lockers are available in White Smoke RAL 9002 as standard or any RAL colour\*.

The lockers are currently available in two widths and a range of heights:

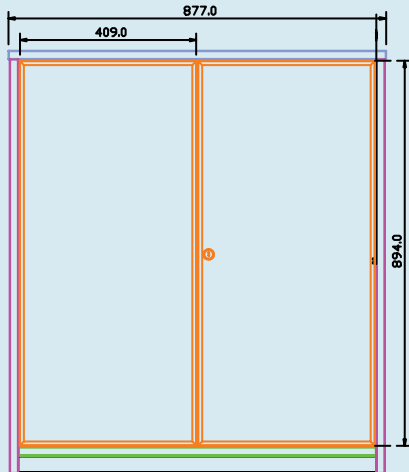

- The Two Pod Proflex Lockers are 877mm wide (2x400mm), the overall heights available are: 981mm high, 1288mm high and 1595mm high.
- The Three Pod Proflex Lockers are 1303mm wide (3x400mm) and the overall heights available are: 981mm high, 1288mm high and 1595mm high.
- All lockers are 500mm deep.
- A 2 door version is also available.
- 10 year guarantee.

\*dependent on quantity and colour.
